

Prospect Genius™

We find customers and send them directly to you!

What we do

Prospect Genius sends local customers to your business. It's that simple. There's no middle-man and no contract. Just local customers contacting you directly for a low monthly fee.

How we do it

1. We find customers online who are already looking for the services you provide.
2. The customers will see your business profile and contact you. They'll call because the profile we've built for you will show them that you're local, you're trustworthy, and you offer the services they need.
3. We don't get in the way, and there's no limit to the number of customers we'll send you each month.

Why you need us

Today, more than ever, customers want to research businesses they deal with by searching for them online. If your website doesn't speak to prospective customers while they're searching online, you won't even have the chance to win their business because they likely won't know you exist!

As of 2007:*

- 1) 60% of all local business searches happen online
- 2) 82% of the people using local search sites follow up their research with offline action.
